Average operator age (years)	52.9	54.1	56.2
% with farming as the primary occupation	53.9	60.8	54.0
Men	33,795	31,583	29,664
Women	4,469	5,672	6,688

Agriculture is important to New York State. Agricultural production returned over \$3.6 billion to the farm economy in 2005. About 25 percent of the state's land area, or 7.55 million acres, are used by the 35,600 farms to produce a very diverse array of food products.

**NOTE: For this compilation a farm is any place that produces &/or sells \$1,000 or more of ag products during the previous year. This enlarges the number of enterprises included and may skew some of the results. I.e.: an individual may raise and sell one heifer for \$1,200 and be included, plus the many part-time farmers who meet this minimum criterion are also included. Information gleaned from NASS.
